WORK EXPERIENCE

DevGlobal LLC | Software Engineer *Remote | 04/2024 – Present*

- Architected a Multi-tenant SaaS backend for 1,000+ tenants, achieving 99.9% uptime and 40% faster data isolation using Node.js and Express.
- Developed 50+ modular RESTful endpoints, reducing frontend integration time by 30% through structured Postman Collections and automated API documentation.
- Implemented JWT with RBAC, enhancing system security and reducing unauthorized access risks by 45% across all microservices.
- Integrated Stripe API to automate billing, reducing manual payment processing errors by 25%, and deployed Socket.io for real-time alerts.
- Built a Jira-like platform using Cron jobs for background tasks, increasing team task-tracking efficiency by 20%.
- Designed a real-time notification system using Server-Sent Events (SSE) and Twilio Webhooks.
- Engineered automated scheduling workflows for Peterson Roofing, resulting in a 35% increase in daily operational service capacity.

Freelance Projects: True Social (Spring Boot/Security/JWT REST API); Vet Connect (Clinic Management System with secure RBAC).

EDUCATION & CERTIFICATIONS

- Computer Science Foundations Course	Code Chef	**07/2022 – 02/2023**
- Advanced Full-Stack Web Development Program	Route Academy	**12/2022 – 12/2023**
- Bachelor of Commerce	Sohag University	**09/2016 - 07/2020**

Ongoing Professional Development

- **DevOps & Infrastructure:** Currently mastering CI/CD pipelines, Docker orchestration, and Kubernetes to enhance deployment workflows and system scalability.
- **AI & Automation:** Exploring AI automation tools and integrating LLMs into backend services to streamline repetitive tasks and improve system intelligence.
